ESPERIENZA LAVORATIVA

Sr.Network Engineer

Comesvil SPA [19/05/2023 – Attuale]

Città: Napoli

Paese: Italia

In my role as a Senior Network Engineer, I'm responsible for the design, implementation, and support of our client's industrial railway network for DCS automation systems. This encompasses identifying and addressing any potential issues, as well as introducing new technologies and strategies to enhance system performance and security.

Key responsibilities include ensuring the network runs seamlessly, maintaining the network's architectural integrity, and outlining roadmaps for future system growth.

I apply my expertise in managing multi-vendor network devices and automating network tasks.

Additionally, I am in charge of enhancing system security and high reliability, leveraging my knowledge of industrial network protocols and IT security systems.

Network Specialist

Tim [15/01/2022 – 18/05/2023]

Città: Napoli

Paese: Italia

In my previous role as a Network Specialist at one of the world's leading service providers, I had the opportunity to refine my skills in network infrastructure management. This experience involved the optimization, implementation, monitoring, and troubleshooting of the network for some of the company's most prestigious clients. This role enabled me to develop a proactive, customer-centric approach, focusing my attention on efficient and reliable network solutions.

Amministratore di rete

Italware [29/05/2019 – 11/2021]

Città: Napoli

Paese: Italia

During my experience at the Enterprise of Poste Italiane I developed excellent problem solving skills, ability to work with various technologies and manage network equipment belonging to different vendors. I carried out Assurance and Delivery tasks, providing support on a national scale, and developed various tools that automated the processes of orchestration, management and troubleshooting of multiple devices.

Penetration tester

Freelancer [31/12/2016 – 30/10/2019]

Città: Napoli

Paese: Italia

Planning and creating penetration methods, scripts and tests

Running remote tests of a customer's network to expose security weaknesses

Simulation and security breaches to test the relative security of a system

Creating reports and recommendations from tests, including security issues discovered and level of risk

Good knowledge of cyber-attacks and attack vectors

Backend developer

Freelancer [31/12/2015 – 30/10/2019]

Città: Napoli

Paese: Italia

Website design with the Python programming language and Django framework.
